The Best Solution of the MRI Examination for Severe Patient

**ETERNITY**

**ETERNITY**

## Safety- Portability -Efficient

### Safety

- SH100 MRI could be used in the MRI environment SH100 without any affect caused on MRI equipment, neither be affected by any MRI equipment.
- The outstanding ventilation method of SH100 will ensure the safety of patient

### Portability

- Easy operation and easy connection to patient.
- Could be assembled with trolley, or bag's optional for easy carrying.

### Efficient

- Complete the MRI examination expeditiously by supplying ventilation to patient.

— NMR environment : 1.5T and 3T static NMR environment.  
— Distance from the NMR: 500GS ( 1 metre distance mark of 3T MRI equipment)

**SH100**

- SH100 could be used on the emergency case during the MRI examination for a lesions early detection; And also used to transfer the patient from ICU to MRI room for examination without suspending ventilation during the recovery after surgery.
